RESEARCH INTERESTS

Open-Endedness Evolutionary Computation Quality-Diversity Reinforcement Learning

EDUCATION

Master of Computer Science Aug 2024 – Nov 2026 (expected)

University of Information Technology (UIT), Viet Nam National University HCMC

Current GPA: 9.09/10

Thesis: *Quality and Diversity Optimization for Data Generation with Generative Models*

Supervisor: Dr. [Ngoc Hoang Luong](#)

Bachelor of Computer Science Aug 2020 – Jun 2024

University of Information Technology (UIT), Viet Nam National University HCMC

GPA: 9.04/10 (Top Graduate, Ranked #1 in CS2020)

Thesis: *Evolutionary Reinforcement Learning for Continuous Control with Stable Phenotypic Variation Operators*

Supervisor: Dr. [Ngoc Hoang Luong](#)

RESEARCH EXPERIENCE

Research Assistant at Evolutionary Learning and Optimization (ELO) Lab Oct 2022 – Present

University of Information Technology (UIT), Viet Nam National University HCMC

- Developed QD methods for adversarial prompt generation in text-to-image and vision-language models.
- Built LLM-assisted QD pipelines for natural language generation and automated social-bias discovery.
- Integrated reinforcement learning with evolutionary computation and designed phenotypic mutation operators for continuous control.

SELECTED PUBLICATIONS

Investigating Robustness in Vision-Language Models via Adversarial Prompt Illumination

Accepted at GECCO 2026 – The Genetic and Evolutionary Computation Conference [\[paper\]](#) [\[code\]](#)

[Thai Huy Nguyen](#), Khoa Tran, Quan Minh Phan, Ngoc Hoang Luong

Diverse and High-Quality Text Generation Assisted by Large Language Models

Knowledge-Based Systems, 2025 [\[paper\]](#) [\[code\]](#)

[Thai Huy Nguyen](#), Ngoc Hoang Luong

Diversifying Adversarial Attacks on Text-to-image Generation

GECCO 2025 Companion – The Genetic and Evolutionary Computation Conference Companion [\[paper\]](#) [\[code\]](#)

[Thai Huy Nguyen](#), Ngoc Hoang Luong

Stable and Sample-Efficient Policy Search for Continuous Control via Hybridizing Phenotypic Evolutionary Algorithm with the Double Actors Regularized Critics

GECCO 2023 – The Genetic and Evolutionary Computation Conference [\[paper\]](#) [\[code\]](#)

[Thai Huy Nguyen](#), Ngoc Hoang Luong

Open-ended Bias Discovery in Large Language Models

Under review

[Thai Huy Nguyen](#), Ngoc Hoang Luong

PROJECTS

- Integrating Soft Actor-Critic with Descriptor-Conditioned RL MAP Elites** [\[code\]](#)
- Replaced TD3 with SAC in DCRL-ME using QDax library, achieving up to 8× higher QD Score on Humanoid.
- Re-implementing RL algorithms in JAX for Atari games, Craftax, Robotics** [\[code\]](#)
- Successfully reproduced Random Network Distillation in JAX, reaching 6,000 on Montezuma’s Revenge after 2B steps.

SCHOLARSHIPS AND AWARDS

PonyChung Scholarship for Graduate Students <i>Pony Chung Foundation; Viet Nam National University HCMC</i>	<i>November 2025</i>
VinIF Scholarship for Master Students <i>Institute of Big Data, VinGroup Innovation Foundation - VinIF</i>	<i>October 2024</i>
Fully Funded Master Scholarship <i>University of Information Technology, Viet Nam National University HCMC</i>	<i>August 2024</i>

SKILLS

Technical Skills	C, C++, Python (PyTorch, JAX, HuggingFace, WandB), Git, Linux, Docker
Languages	English (Fluent), Vietnamese (Native)
